## Education

### California State University of San Marcos

San Marcos, CA

Expected Graduation by May 2022

- Bachelor of Science in Computer Science
- Dean's List: Fall 2018 (GPA 3.6) & Spring 2019 (GPA 4.0)
- Relevant Coursework: Computer Science I & II (C++), Assembly and Digital Circuits(MIPS)

## Experience and Projects

### STEM Center Tutor

San Marcos, CA

January 2020 - Present

- Tutor students in **C++** and **Mips Assembly Language** in preparation for current and future classes
- Constructed small group and one-on-one sessions to enhance other students C++ skills, such as functions, control statements, and classes and objects

### Google Computer Science Summer Institute Extension

San Marcos, CA

July 2018 - August 2018

- Participated in a three-week course that taught the basic concepts of **HTML**, **CSS**, **JavaScript**, and **Python**
- Worked with four other participants in a week-long web application powered by **Google App Engine** to provide meal recommendations based on visitors' ingredient preference
- Front-End developer in creating webpages focusing on user input

### Personal Project: SimplePianoKeys— Website

August 2018 - October 2018

- Developed an interactive website that allows the user to play the piano on their computer
- Created the webpages and designed through **HTML** and **CSS**
- Developed the backend using the language **Python**, and utilizing the **Jinja** web template
- Deployed the website using **Google App Engine**

### Personal Project: BobaMe— Mobile App

May 2019 - October 2019

- Lead developer specializing in creating an application for locating Boba tea restaurants in the user's area
- Created the UI/UX using a **Python** framework called **Kivy**, which allowed the language to be used for developing mobile applications
- Using the **Yelp API**, it helped make user requests to find Boba tea shops in the user's area

## Skills

- C++, Python, HTML, CSS, Javascript
